Here are the cover letters from the ARCO initial and supplemental responses. They both indicate that all documents are non-privileged.

Thanks for the clarification, Scott. Just to be clear, ARCO did not claim confidentiality on ANY record produced in response to our 104e request, correct?

CFAC claimed confidentiality on their entire response. ARCO did not.

Mark is out today, but I'll look into the CBI issue.

Were ARCO's 104e records labeled as CBI? All of them, or just certain ones?

I'll send the document you requested shortly.

Nice work! Did this come in labeled CBI? If so, we'd have to address that prior to using it in the HRS package. Do you know the process for challenging CBI? I've copied Mark and Anthony as well for this discussion.

Anthony, would you mind sending the document that you found which outlines the spent potliner going into the landfills? I imagine we'll have to go through a similar process for that as well.

Regarding my review, I'm falling a bit behind. Another site popped up which has taken up quite a bit of time. I'm still hopeful to review both the initial and final ARCO submittals today.

Thanks,
Rob

Looks like I got lucky. Found it on the third file I opened.

Hey Scott –

I'm not sure how best to accomplish this request from our contractor. I'd imagine it would be in the CFAC response given the CFAC name in the document title.

Any thoughts?

Rob

Hi Rob,

I was wondering if you could have the person(s) compiling the records received from the PRP look specifically for the following report:

Hydrometrics, 1985. Hydrogeologic Evaluation, Columbia Falls Aluminum Company, Columbia Falls, Montana.
September 16, 1985.

This would be really helpful for the Groundwater section that is due Wednesday, so if you can get it to me as soon as possible that would be greatly appreciated, assuming you have it of course.

Thank you,

Natalie Quiet
